

What is Grow My Search?

Tsubasa Kato 2021/8/17

Grow My Search is the latest search engine developed by Inspire Search Corporation based in Hiratsuka, Kanagawa, Japan.

We developed a personal web search engine where you will be able to create your own search index by using your own crawler via a web browser.

We hope to benefit those who need more information than a regular search engine.

Grow My Search gets the words you want to expand about and will send it to other search engines to get the seed URL for the crawler to start crawling.

As of 8/17/2021, we support 3 types of search engines to get the seeds for the crawler.

- Usearch (based in Israel),
- Searx (meta search engine where it will grab results from major search engines) and
- Yacy (community based web search engine).

You can also start crawling from a URL.

You will only need to create an account from here:

<https://www.growmysearch.com/register.php>

After you create an account, you will be able to use the web crawler.

(Note: you will need to crawl sites and insert it to index to be able to search unlike most typical search engines)

Enjoy your search!
